FREDMAN BAKING PAPERS

The Fredman baking papers are perfect tools valued by kitchen professionals. The baking paper is made from the best, clean raw materials. The PEFC label found on the Fredman baking papers indicates that the wood raw material used in manufacturing comes from a sustainably managed forest and a controlled source. Baking papers protect food from sticking to GN trays. They also reduce food waste, as food does not stick to the bottom of the dish. Heat resistance 220 °C.

FREDMAN GREEN PE PLASTIC BAGS

The main raw material for the Fredman Green PE plastic bags comes from nature, as the polyethylene in the bags is made from sugar cane. Green PE material, made from renewable resources, has the same characteristics as traditional plastic, but it is soft and breathable. Green PE plastic is bio-based, but it is not biodegradable. The key benefit of using Fredman Green PE plastic bags is their smaller carbon footprint as well as the amount of fossil fuels saved.

FREDMAN VACUUM BAGS

The Fredman vacuum bags are made from durable and food-grade plastic. The airtight vacuum bag is a great way to store quality raw materials and foods such as meat, fish, coffee and spices. Vacuum packaging both extends the shelf life of a product and reduces its drying. The Fredman vacuum bags are also great for meat hanging, freezing and Sous Vide cooking.

Plain and embossed vacuum bags:

Heat resistance:

- When frozen at -25 ° C
- Cooking: +40 - + 70 ° C max 2 hours and +70 to + 100 ° C for max 15 minutes.

Vacuum bags for liquids:

Heat resistance:

- Not recommended for freezing due to stiffening.
- For cooking: 121 ° C max 2 hours.

FREDMAN FOILS

Fredman's foil is a perfect tool valued by kitchen professionals. It protects the best flavors when preparing or storing food. It has excellent heat, moisture and cold resistance. You can use it in the oven, grill, cold room, refrigerator or freezer. The foil is not suitable to be used directly on metal surfaces, so do not place it directly on the bottom of the oven, for example. Blackened foil is harmless. Heat resistance 280 °C.

FREDMAN BIO LUNCH BOXES

The eco-friendly Fredman bio lunch boxes complement Fredman's take away concept. The Fredman bio lunch boxes are available in three different sizes, the biggest of which is available in 1, 2 or 3 pieces.

The bio lunch boxes are an ecological and conscious choice. The lunch boxes are made of bagasse, which is a reused byproduct generated in sugar production. Up to 30% of sugar cane used for sugar production ends up as by-product. Bagasse is an ecological alternative to plastic. The Fredman bio lunch box is 100% biodegradable. Used boxes are sorted into biowaste.

The box is suitable for cold and hot meals. It is sturdy and well suited for oily and greasy foods.

Fredman bio lunch box is microwave and oven safe, and a professional's choice for transporting food safely. The heat resistance of bio lunch boxes is -25 C to +110 C, greasy max +70 C.

How to lead your professional kitchen with knowledge?

Take your food business towards a more profitable and sustainable future - digitally.

Chefstein® – your digital kitchen assistant.

KITCHEN WORKFLOW

- Digital checklists keep kitchen tasks in order.
- Measurement records provide real-time data and statistics.
- Alarms for key checkpoints prevent risks.
- Dashboard shows and its trends at any time the pulse of the kitchen

FOOD SAFETY

HYGIENE

FOOD SAFETY

- Self-monitoring and HACCP become automated.
- Always-on sensors track temperatures for risk prevention.
- Hand-held probes give on the spot temperature readings.
- Remote monitoring for peace of mind.

Chefstein® is all about optimising professional kitchen operations for profitable business decisions, sustainability and incredible food experiences. It is a new kind of digital kitchen management solution that saves time, money and resources. It organises kitchen workflow, monitors food safety and hygiene and helps track and reduce food waste in efficient and effortless ways. Because you - and the kitchen team - have better things to do.

KITCHEN WORKFLOW

A FOOD DELIVERY & TAKE AWAY WASTE

FOOD WASTE

HYGIENE

- Scheduled hygiene tasks become routine.
- Surface hygiene readings instantly available with ATP luminometer.
- Trends reports help prevent risks.
- Reputation management supported by seamless hygiene processes.

FOOD WASTE

- Continuous food waste reduction based on on-site data.
- Reports on waste type, amount and reason guide corrective actions.
- Wireless Smart Scale performs real-time monitoring easily via existing bins.
- Plug-and-play food waste intelligence.
