

# FREDMAN BAKING PAPERS

Fredman baking papers are made from the best, pure raw materials. Our selection includes products in a variety of sheet sizes and roll lengths. Our Finnish-made baking papers carry the Nordic Swan Ecolabel and PEFC certification. Used baking paper can be composted as it is fully biodegradable.

# FREDMAN WAXED PAPER

An alternative to cling film and foil, Fredman waxed paper is suitable for cold storage. Thanks to its non-stick coating, it is also ideal for lining countertops when baking. Made from FSC certified paper and coated with plant-based carnauba wax, the waxed paper is also moisture resistant. It prevents crunchy foods from getting soggy and helps juicy foods retain their moisture. The waxed paper is biodegradable, and the packaging can be recycled with cardboard.
